

## DB3 THRU DB6

### SILICON BIDIRECTIONAL DIAC

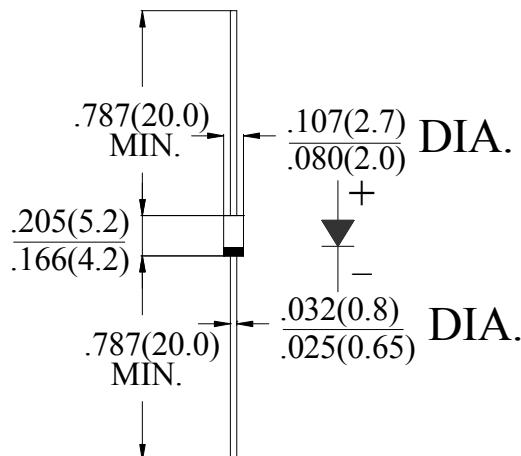

#### FEATURES

- The three layer, two terminal, axial lead, hermetically sealed diacs are designed specifically for triggering thyristors.
- They demonstrate low breakover current at breakover voltage as they withstand peak pulse current,
- The breakover symmetry is within three volts (DB3,DB34,DB4) or our volts(DB5,DB6).
- These diacs are intended for use in thyristors phase control , circuits for lamp dimming, universal motor speed control , and heat control. °C

#### MECHANICAL DATA

- Case: Molded plastic
- Epoxy: UL94V-0 rate flame retardant
- Lead: MIL-STD- 202E, Method 208 guaranteed
- Polarity: Color band denotes cathode end
- Mounting position: Any
- Weight: 0.33 grams
